

## MODELS

The **Wallgate CLASSIC handwashing and drying unit** is a self contained and fully recessed hand hygiene facility dispensing soap from a 4 litre container, internally heated warm water and high-powered hot air drying. The CLASSIC units replace sinks, taps, water heaters; their pipes and control valves, soap dispensers, hand driers and splashback tiling *including most of the associated expensive on-site labour.*

The CLASSIC unit has been evaluated by the Public Health Laboratory Service against traditional washroom equipment and showed an increase in hygiene performance achieved.

The unit is available in 3 button manual (Model CME\_41 or sensor automatic operation (Model CME\_45)

## SOAPS

Liquid soap is dispensed from a **4 litre high capacity** container accessible behind the door.

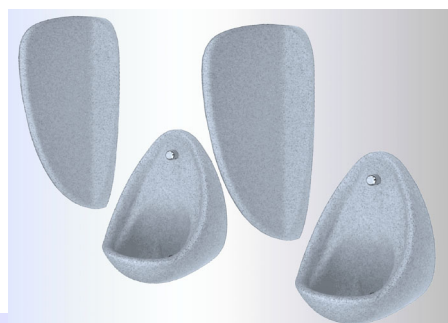

Soaps are available from the WALCARE range of low cost soaps with superior skin care properties.

## INSTALLATION

The unit is modular in construction supplied pre-plumbed and pre-wired to minimise installation labour and materials. Sub frames are provided for ease of fitting. The only supply connections needed are a single 15mm cold water feed and a 13Amp 230V 50hz electrical supply. The waste connection is a 1.25" BSP outlet.

## CONSTRUCTION

The fascia is manufactured in high quality Wallgate Solid Surface. The highly durable solid surface material is non inflammable, stain and scratch resistant. It has been tested to a range of international standards.

**Wallgate Ltd,**  
**Crow Lane, Wilton, Salisbury,**  
**Wiltshire**  
**SP2 OHB**

## BENEFITS

- ◆ **Anti-vandal design**
- ◆  **Designed for disabled persons**
- ◆ **Modular low-cost installation**
- ◆ **Low running costs energy & water**
- ◆ **4 Litre soap capacity**
- ◆ **Matching urinal, WC pan & shower available**

## APPROVALS

The unit is electrotechnically approved and carries the CE mark for the low voltage directive and EMC, plus the WRAS approval.

The Wallgate solid surface material has a BS476@ Class 1 & 0 fire certificate (non inflammable). The fascia is also highly chemical and stain resistant. BS EN 438 Pt1. The material has a constant texture and finish throughout the product enabling repairs if necessary.

## COLOURS

The CLASSIC Handwasher Drier is available in several granite colours. Ask for the Wallgate Solid Surface colour sheet.

## MATCHING SANITARY-WARE

A unique patented WC pan and urinal system is available to go with the CLASSIC, which can also be supplied in the same colours and the handwasher drier. The CLASSIC WC price is a fraction of the stainless steel equivalent making the Classic solid surface sanitaryware a superb alternative material.

## OPERATION

The CLASSIC represents a clear step forward in de-cluttering the washroom and greatly improving vandal resistance.

The Sensor Automatic unit is operated by placing the hands in the bowl which initiates a preset cycle of soap, heated warm water and hot air drying.

**Water temperature** is adjusted by a control valve sited within the cabinet.

## OPTIONS

- √ **Frost Protection thermostat & heater**
- √ **3 button or Sensor Auto operation**

## SAVINGS

During the manufacturing process within our ISO 9001 accredited factory, much on-site labour costs associated with traditional plumbing and electrical fittings have been eliminated.

The units contain an energy efficient 3kW instantaneous water heater, that consumes power only when the unit is in use.

**Typical water savings are 75%** because the latest electronic controls results in **less than 0.5 litre \* of water being dispensed per cycle** whilst **only 0.04kWhrs** of electrical power is used per operation. Up to **0.4 sq m of building area** is saved per unit compared to alternative systems. (\* Based on a 15 second water cycle).

## AFTER SALES SERVICE

Wallgate offers a 12 months on-site warranty plus comprehensive service, repair and spare parts facilities. This warranty can be extended each year. For full details contact the customer service department.
